## SCORE DECOMPOSITION

**item 114 · Travel & Transport · rank 1 in X-SAGE list**

$score\_total = score\_base + situational\ nudge \rightarrow 3.843 = 3.843 + +0.000$

## NATURAL LANGUAGE

This situation ('Weekday hop') is not an inequity sink: the recommendations are the base FM's, unmodified.

*Situation is NOT an inequity sink → the nudge is identically 0 on every item; X-SAGE list = B\_blind list. The decomposition still applies (with nudge=0), preserving faithfulness (B8.3).*
